## Resumo

I'm Civil Engineer specializing in programming.

I'm currently improving my knowledge of HTML, CSS, JavaScript and Git.

The next steps are to acquire knowledge in TypeScript and Node.js.

Also, I'm very open minded when it comes to learning new tools, new frameworks and new languages.

Briefly, but importantly, I have worked for some years in the civil construction sector, where I bring a certain experience in managing people and projects, managing deadlines, costs and quality in the execution of civil works.

---

## Experiência

Lampur Engenharia

Engenheiro civil

fevereiro de 2022 - janeiro de 2023 (1 ano)

Itupeva, São Paulo, Brazil

I performed activities such as:

- Follow-up of works, verifications along with projects and quantitative survey.
- Assembly of bidding processes, compatibility of commercial proposals, negotiation with suppliers, purchase and control of material associated with the release of invoices and payment schedule.
- Service contracting and contract management.
- Schedule monitoring, planning, control and management of high standard residential works.

All the residences I worked on are inside the Fazenda da Gramma Condominium.

## P&P Engenharia

Assistente de engenharia

dezembro de 2021 - janeiro de 2022 (2 meses)

Itupeva

Supervision of great residential works at the Fazenda da Gramma Condominium.

## Construtora Terras Novas TNC LTDA

Estagiário de engenharia civil

maio de 2021 - novembro de 2021 (7 meses)

Itupeva, São Paulo, Brasil

---
